FOR IMMEDIATE RELEASE

THE WELLNESS INSTITUTE OF NEURODEVELOPMENT OPENS IN TANGLEWOOD

Dr. Baez-Franceschi specializes in neurodevelopment disorders for patients of all ages

HOUSTON (June 2019)...Dr. Carmen Baez-Franceschi, MD, MBA, FAAP, a Board Certified Pediatrician for over 20 years, recently opened her second location of **The Wellness Institute of Neurodevelopment** at 5757 Woodway Dr., Ste. 190, 77057. WIN is a treatment center for children, adolescents and adults with neurodevelopment disorders. Common conditions treated by WIN include Autism, ADD/ADHD, Central Auditory Processing Disorders, Speech Delay, Sensory Integration Deficits and Motor Delays.

WIN Houston, an extension of Franceschi's original institute in Puerto Rico, offers services that make accurate diagnosis possible for individuals with a history of not responding to treatments or poor results from other therapeutic options. Dr. Baez-Franceschi developed the **Franceschi Method™**, an individualized treatment protocol for neurological conditions that combines conventional with complementary medicine using innovative treatments and technology. The progress is measured continually utilizing neurological and quantitative evaluations. A combination of wellness counseling, multisensory and socio-emotional and development therapies maximizes results from a holistic approach.

The new Houston office includes over 3,000 square feet of clinical space with cutting-edge equipment including: Hyperbaric Chamber, Pulse electromagnetic field (PEMF), Neurofeedback, Integrated Learning System (advanced), Makoto arena, Augmented Climbing Wall, Bubble Rover, among others. "We make treatments fun for children, so they are actively engaged in the rehabilitation program," said Dr. Baez-Franceschi. The waiting/observation room is also paramount for parents to view activities through mirrored windows. "I train the parents as well as the children so they can follow-up the exercises at home, which maximizes results."

Hundreds of children have benefitted from Dr. Baez-Franceschi's unique clinical approach, which utilizes the best available technology and her team's expertise to achieve success. "I believe that the medical profession requires a life-long commitment to our patients," said Dr. Baez-Franceschi. "We are committed to excellence and constantly seek new treatment options to improve our results."

About Dr. Carmen Baez-Franceschi

Dr. Carmen Baez-Franceschi is Founder and Chief Executive Officer of The Wellness Institute of Neurodevelopment (WIN). Dr. Baez-Franceschi is a Board Certified Pediatrician with over twenty years of experience and maintains medical licenses in Texas, Florida and Puerto Rico.
